Summary

Gameplay Engineer with a strong foundation in **C++** and **Unreal Engine 5**. After completing the rigorous **42 Roma Common Core**, I developed a specialized skill set in low-level memory management and high-performance system architecture. Experienced in developing modular gameplay frameworks, including the **Gameplay Ability System (GAS)** and custom locomotion systems. I combine a deep technical interest in **3D Mathematics** and design patterns to engineer immersive and scalable interactive environments.

Main Skills

 **C++**

Advanced

Memory Management, Design
Patterns, Best Practices

 **Unreal Engine 5**

Advanced

C++, Blueprints, GAS, Multiplayer

 **3D Math & Geometry**

Advanced

Raycasting, DDA, Trigonometry,
Linear Algebra

Secondary Skills

 **Software Engineering**

Advanced

Perforce, Git, Design Patterns, Docker,
Python, Linux

 **Godot 4**

Intermediate

GDScript, 2D, Multiplayer

 **Full Stack Web Technologies**

Advanced

Vue.js, PHP, Websockets

Unreal Engine Projects

Makhia

January 2026 - Actively Work in Progress

Online 1v1 Melee RPG | UE 5.7, C++, GAS, EOS

- **GAS Multiplayer Architecture:** Developed a robust combat framework leveraging GAS to handle **attribute replication, server-side validation, and client-side prediction**, ensuring responsive mechanics.
- **EOS P2P Integration:** Implemented **Epic Online Services** for Peer-to-Peer connectivity and matchmaking, ensuring long-term game availability and zero server overhead costs.
- **MVC Pattern Implementation:** Architected a clear **MVC separation** by implementing the **Model in C++** for core logic and state management, while utilizing **Blueprints for the View** and UI feedback.
- **Modular Architecture:** Engineered a decoupled Character System using **C++ base classes** and Data Assets for scalable RPG mechanics, including a **custom C++ locomotion and movement system** developed to replace standard Blueprint templates for enhanced control and performance.

TargetShootingGame

July 2025

Simple FPS | UE 5.6, Nanite, Lumen, Chaos Physics

- Being my first UE Project it served as an introduction to several UE5 key concepts

Other Projects

Cub3D

Developed in C from Scratch | 3D | Raycasting | DDA

November 2024 - March 2025

IceSkating

Godot 4 | Multiplayer | 2D Puzzle Game | Procedural Maps

June 2025 - July 2025

Web Pong

Web-App | Multiplayer Pong Game | Real-Time using WebSocket | VueJS | FastAPI

January 2026 - April 2026

Work Experience

KeyBiz

Freelance Game Developer

Remote

11/09/2025 - 10/10/2025

- Developed a web-based mini-game using **Godot**, optimized for high-traffic corporate websites.
- Ensured cross-device compatibility with a focus on **mobile responsiveness** and performance.
- Built a modular system to facilitate **easy level expansion** and content updates.

Magnus Monitor

Intern

Galway, IRL

01/10/2022 - 31/12/2022

Assembly and Configuration of IoT Company's Devices which monitor liquid inside tanks

Education

42 Rome

Software Engineering & Advanced Computer Science

Common Core Curriculum • (Level 10 - Completed)

Rome, IT • 08/01/2024 - Ongoing

Completed the rigorous, project-based **42 Roma Luiss Common Core**, mastering **C/C++**, memory management, and network protocols in a peer-to-peer environment.

Currently pursuing **Advanced Specialization** in [Graphics & Gaming, Algo & AI & Data, Web & Mobile]

ITI B. Lucarelli

Information Technology & Telecommunications

High School Diploma • 100/100

Benevento, IT • 01/10/2019 - 08/07/2022

- Learned to program in C/C++, Java, JavaScript and PHP.
- Developed Web & Mobile Applications Production-Ready.

Certifications

CCNAv7: Introduction to the Networks

Cisco Networking Academy

27/05/2022

Introduction to Cybersecurity
